“NIKA” manufacturing company successfully carries on the business since 1998. Excellent quality and customer loyalty is one of the fundamental principles of the company. The company uses only high quality stock and raw materials for production, which allows “NIKA” products to serve people for many years.

Our production facilities of more than 26 000 sq. m. include the shops for polymer coating, welding, stamping, plastic molding and assembly of the finished products. Expansion and modernization of existing capacities allowed to increase the production of component parts at our own factory up to 80%. This approach gave excellent results and allowed not only to increase the volume of products, but also to significantly improve the quality, broaden the range of products and implement bold design solutions.
